Dear Richard,

Having found two rather unusual bronzes that needed to be shown to the best advantage in my country apartment, I could not be more pleased with the plinths you have made for them. Not only are the proportions just right for the sculptures themselves, but the imaginative marbling of the plinths perfectly suits the background decoration in the rooms where they are placed.

With this splendid result as an example of your skill, I await your next, and even more demanding, project with eager anticipation.

Yours sincerely,
